AET Products

Business Portal

Manage an entire book of private investments from a single interface with full visibility across deals and investors. AET integrates with platforms like Orion, Black Diamond, and Tamarac, eliminating manual data entry and reconciliation while handling custody and reporting in the background.

Investor Portal

Give clients a modern experience where they can view performance, access documents and tax forms, update beneficiaries, initiate transfers, and track their full private asset portfolio in real time.

Trust API

Build a new product or enhance an existing platform with secure, compliant access to qualified accounts and private asset custody. AET's Trust API gives offers full control over onboarding, account creation, asset flows, and reporting.

API Documentation

Review our full API documentation and developer center to uncover how you can integrate AET services in to an existing product.
